

Senior FrontEnd (Angular) Engineer

Location: Nicosia, Cyprus, European Union.

We are seeking an ambitious and self-driven Senior Developer to join our dynamic team in Cyprus (EU), embarking on the launch of a disruptive low-code software development platform. This innovative platform empowers millions to craft bespoke applications, addressing challenges and streamlining operations without the need for coding expertise.

This role thrives within a fast-paced environment, calling for a proactive approach and a creative mindset. Your responsibilities encompass harnessing cutting-edge technology to implement visual elements for user-designed applications, while also facilitating seamless back-end logic for users constructing processes within their applications. This journey offers both autonomy and training, providing you with the opportunity to propel your career forward while making a significant impact.

Key aspects of the role:

- **Communication:** Clear, collaborative communication with team members and stakeholders.
- **Problem Solving:** Critical thinking for innovative solutions within Angular projects.
- **Leadership:** Mentorship, teamwork, and positive influence on junior developers.
- **Adaptability:** Flexibility to embrace change and evolving Angular trends.
- **Time Management:** Efficiently handle tasks, meet deadlines, and prioritize effectively.
- **Attention to Detail:** Thoroughness in code, testing, and implementation.
- **Creativity:** Innovative ideas for enhancing Angular UI/UX.
- **Empathy:** User-centric approach for improved user experiences.
- **Conflict Resolution:** Constructive handling of conflicts and challenges.
- **Continuous Learning:** Commitment to staying updated and improving skills.

Technical Skills:

- **Angular Framework:** In-depth expertise in Angular, including a deep understanding of Angular concepts, architecture, components, directives, services, and dependency injection.
- **TypeScript:** Proficiency in TypeScript, which is the primary language used with Angular. Strong understanding of TypeScript features, such as static typing, interfaces, classes, decorators, and generics.
- **RxJS:** Proficiency in Reactive Extensions for JavaScript (RxJS), used for handling asynchronous operations and data streams within an Angular application.
- **State Management:** Experience with state management libraries like NgRx or Akita to manage complex application states in a predictable manner.
- **Component Libraries:** Familiarity with component libraries like Angular Material or other UI libraries to create consistent and responsive user interfaces.

- **RESTful APIs and HTTP:** Strong understanding of RESTful API design principles and experience in consuming APIs using Angular's HttpClient module.
- **Webpack or Angular CLI:** Proficiency in build tools like Webpack or the Angular CLI for setting up and optimizing project builds.
- **Performance Optimization:** Ability to optimize the performance of Angular applications by minimizing bundle sizes, lazy loading modules, and implementing other best practices.
- **Responsive Design:** Skill in creating responsive and mobile-friendly user interfaces using CSS frameworks like Flexbox or CSS Grid.
- **Git and Version Control:** Proficient in using Git for version control, including branching, merging, and resolving conflicts.
- **Code Reviews:** Experience with conducting and participating in code reviews to maintain code quality, consistency, and adherence to best practices.
- **Debugging and Troubleshooting:** Strong problem-solving skills to diagnose and resolve issues in Angular applications using browser developer tools and other debugging techniques.
- **Agile/Scrum Methodology:** Familiarity with Agile development methodologies and working in a Scrum team environment.
- **Security Best Practices:** Awareness of security best practices and techniques for securing Angular applications against common vulnerabilities.
- **Browser Compatibility:** Understanding of cross-browser compatibility issues and ability to implement solutions for consistent behaviour across different browsers.
- **Continuous Learning:** Proactive approach to staying up to date with the latest Angular updates, trends, and emerging technologies in the frontend development ecosystem.

Our core values:

We are in search of an individual with an unwavering positive outlook, a determination to overcome obstacles, and a penchant for embracing challenges as opportunities. As an integral member of our startup team, you must exhibit dedication, adaptability, dynamism, and a strong desire to shoulder responsibilities.

Our company is pleased to offer visa sponsorship and a comprehensive relocation package to Cyprus, ensuring a smooth transition to the EU. The compensation for this position is highly competitive within the Cyprus market and is tailored to align with the candidate's skills and qualifications, reflecting our commitment to attracting and valuing top talent.
