

Senior Cloud Engineer

INTERVIEWING NOW FOR START IN 1 MONTH. VISA ORGANISED.

Job title: Senior Cloud Engineer - Edge Cloud

Salary: Competitive

Location: Nicosia, Cyprus

An exciting opportunity has arisen for a Senior Cloud Engineer to join us as we build the future of cloud computing- a revolutionary community owned public edge cloud. Check out our platform here: <https://creatingly.tech>

We are launching a disruptive low code software development platform, empowering millions to create custom applications to solve problems and streamline processes, without the knowledge of code. All applications will be run from our Cloud via Kubernetes.

You will have the opportunity to lead in the architectural design and maintenance of this challenging and disruptive project that will change the future of cloud computing in the world. You will be building all of our clusters and data centres, maintaining and deploying Kubernetes to manage the infrastructure upon which user applications will be run.

Two roles available:

- Core Infrastructure Engineer
- Cloud Developer

Salary: competitive with Cyprus (EU).

Desired Specialisations:

- Networking and preferable with telecommunications
- Or Security

Key aspects of the role:

- Build a monitoring and alerting environment using Prometheus and Grafana for our worldwide data centres.
- Facilitate automated deployment of clusters for various customer groups.
- Deploy Kubernetes using Ansible/Terraform across global data centers, and Helm charts or Kustomize for seamless application deployment.
- Maintain physical environments, keeping applications up to date, patching and managing security risks.

Requirements - Core infrastructure engineer

Key skills - Kubernetes, Calico, Prometheus, Ceph, **Terraform** and **Grafana**

- Must have strong experience with Kubernetes, Calico, Prometheus, Docker, Ceph/any storage system
- Good knowledge and hands-on experience of containerization and the orchestration of them e.g. OpenStack or VMWare.

- Strong knowledge and experience in one of the following cloud providers Azure, Amazon Web Services, Google Cloud Platform.
- Have experience managing in routers and switches, ideally with cisco certification.
- Strong scripting abilities (Python, PowerShell, Bash) and proven ability to use APIs to automate tooling, delivery pipelines and operational support.
- Reporting and monitoring with Prometheus
- Experience with loadbalancer and troubleshooting.
- Good to have experience managing in routers and switches, ideally with cisco certification.
- Good to have experience in HAProxy and S3

Requirements- Cloud Developer:

Key Skills - Kubernetes, Helm 3, Jenkins, Istio, Postgres/MongoDB

- Must have strong experience in Kubernetes, RBAC, Helm 3, Jenkins, Docker, Ceph, Calico and Istio
- Strong Linux scripting abilities and proven abilities to use APIs to automate tooling, delivery pipelines and operational support.
- Good to have experience in Git, CephFS, Ansible
- Extensive experience in practices of DevOps and CI/CD within a data platform using Jenkins, comfortable working with CI/CD processes and tooling from code repositories such as GitLab/GitHub, continuous integration.
- Hands on strong experience in DevOps Engineering, Computer Science, including algorithms, data structures, operating systems, programming languages.

Person specification:

We are seeking a person with a positive, unstoppable, winning attitude who is an opportunity maker and thrives on being challenged. Being part of a start up team, you need to be committed, flexible, dynamic and hungry to take on responsibility.

Key skills:

- Ambitious and self-driven to solve complex problems.
- Detail-driven, numerate and excellent problem-solving abilities.
- Creative and innovative
- Committed to delivering and maintaining high standards
- A strong sense of ownership and a passion to deliver a world-class user experience for the no code platform.
- Critical time management skills
- Able to anticipate bottlenecks and escalate as needed
- Able to balance business needs versus technical constraints.
- Advanced quantitative analytical abilities.
- A high standard of written and spoken English
- Managing time efficiently and effectively
- Experience delivering complex projects in partnership with remote colleagues.
- A passion for software and technology
- An open and collaborative working style

Our culture comprises of people who are:

Tenacious

Intellectual

Loyal

Hardworking

Dedicated

Resilient to adversity

Innovative / Entrepreneurial

Humble in nature

Hungry to learn and grow

Naturally curious

Team players

A handful of our benefits:

Creatingly gives people the opportunity to be able to solve complex problems and build a low code platform that makes a difference to people globally, by making software development accessible to the masses. You will be transforming industries, and radically transform the status quo of low code software development. At Creatingly we are changing the world and you will be part of this movement.

- Facilitation of your relocation to Cyprus.
- Pathway to European citizenship.
- You will have the opportunity to apply ingenuity to solving complex problems and utilise cutting edge tools and methodologies. You will be building a revolutionary ground-breaking decentralised cloud that makes a difference to people globally. You will be transforming industries, and radically transform the status quo of cloud computing.
